5. Inflation adjustment

Every year on 1st August, the monetary sums in this tariff will be adjusted for inflation. The adjustment formula will apply to the standard rates, using the mean (to the nearest whole percentage point) of the percentages by which the Retail Prices Index and Average Weekly Earnings index (unadjusted) change in the year to the previous March.

March is the latest month prior to the anniversary date for which figures are likely to be published for both indices.

After application of the inflation adjustment any expenditure threshold figure will be rounded to the nearest pound, with all other royalty rates rounded to the nearest penny.

All royalties will be charged at the royalty rate in force at the beginning of the licence-year.
